

# Successful funding pathways in digital health

30th June 2021

11:00 to 12:30 CET

The DigitalHealthEurope project, financed by H2020, has a task on Funding support services for the large-scale deployment and scale-up of digital solutions for person-centred integrated care. As a contribution to this, RSCN is using the experience of its network to organise an online event. The event will raise awareness of successful funding pathways in regions. The ambition is to grow the participation of digital health stakeholders from throughout European funding programmes.

RSCN has invited two Reference Site regions to share their success stories with the audience.

In the session, you will learn all about securing and combining funding at different levels to advance your own digital health and care agendas.

The interactive and dynamic workshop equally targets a wide range of multiple stakeholders: health and care policy makers, healthcare providers, researchers, industry, and civil society organisations.
